

## 9.2.

1. There is two mode setting about "lights combination" as below:

### 4 lights combination:

Set "M 2\*2" mode on master light. Other slave lights set it SL-2, SL-3, SL-4 separately.

### 16 lights combination:

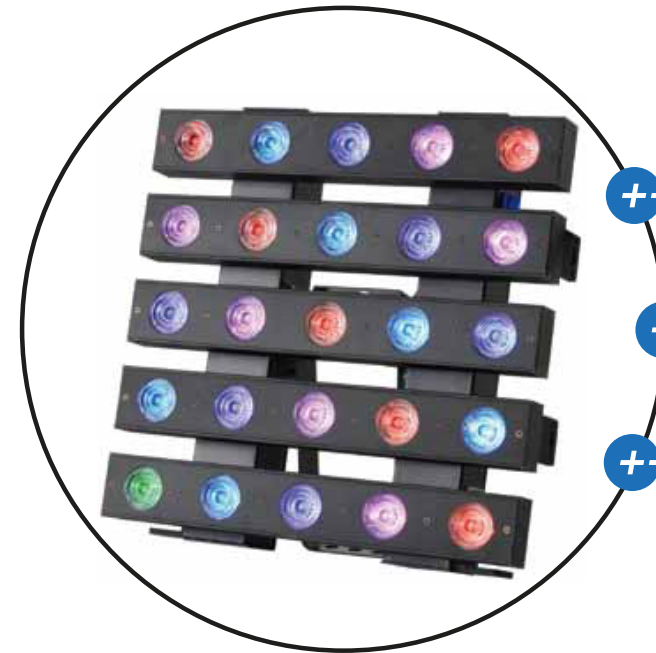

Set "M 4\*4" mode on master light. Other slave lights set it from SL-2 to SL-16 separately.

### 2. "DMX combination" setting mode:

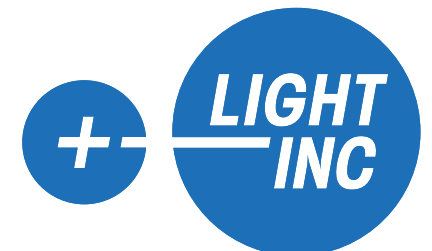

Set all lights DMX channel to be "100CH". Set the DMX address of first light is 1, second light is 101, the third light is 201, and so on.
