MH-200 LED HYBRID

The MH-200 LED Hybrid is a 200 Watt Beam/Spot Movinghead. By means of an extra lens the beam can switch between a beam angle of 5 or 13 degrees. With this you can not only make tight beams, but also project beautiful gobos. The MH-200 LED Hybrid also has 6 rotating gobos, 8 static gobos and 7 colors. Finally, there is also a 3 facet rotating prism to make it complete!

SPECIFICATIONS

SOURCE

- LED: 200W High Power White LED
- Beam angle: 5 / 13 degrees

COLORS

- 7-open, indexable and bidirectional rainbow effect
- Color scroll
